10. Deliverables Expected from Vendor

- Fully functional website
- Admin panel access
- Source code & credentials
- SEO setup implementation
- AI-friendly content structuring
- Documentation & training
- Backup & security setup

11. Project Management & Timeline

- Detailed project plan with milestones to be shared before start
- Timeline breakup:
  - Design Phase
  - Development Phase
  - Testing Phase
  - Deployment
- Weekly progress updates mandatory
- TAT (Turnaround Time): Website go-live is expected within 30–45 days from project kickoff

12. Performance & Speed Requirements

- Website load time should be **< 3 seconds**
- Optimized for **Core Web Vitals (Google standards)**
- Image optimization and lazy loading required
- High performance across devices (desktop, mobile, tablet)

13. Security Requirements

- SSL implementation mandatory
- Protection against common vulnerabilities (XSS, SQL Injection, etc.)
- Regular backups (automated)
- Admin access control & role management

14. Testing & Quality Assurance

- Cross-browser compatibility (Chrome, Safari, Edge, Firefox)
- Mobile responsiveness testing
- Form testing (all enquiry forms must work properly)
- No broken links or missing pages
- AI validation to ensure content structure, schema, and pages are optimized for AI-driven platforms (ChatGPT, Google SGE, voice search)
- SEO validation before launch

15. Training & Handover

- Complete training for internal team on CMS usage
- Documentation for:
    - Adding products
    - Editing content
    - Managing enquiries
- Full handover of:
    - Source code
    - Admin credentials
    - Hosting access

16. Post-Launch Support

- Minimum **60–90 days support period** after launch
- Bug fixing included (no extra cost)
- Vendor must provide a Service Level Agreement (SLA) for a minimum period of 5 years covering support, maintenance, and issue resolution timelines
- AMC (Annual Maintenance Cost) to be quoted separately

17. Lead Management System

All enquiry forms across the website must comply with the following:

- All leads must be:
    - Stored in backend (CMS database)
    - Trigger instant email notifications to designated email IDs
    - Logged with timestamp and source
- Lead fields must include:

- Name, Company, Email, Phone
- Product of interest
- Region / Country
- Source (Organic / Paid / Direct / Campaign)

- System must support:
  - Lead tagging (Product / Region / Campaign)
  - Lead filtering and search in backend
  - Export leads in Excel / CSV format
- Integration requirements:
  - CRM integration readiness (Zoho CRM or similar)
  - API-based lead push capability
- Auto-response:
  - Automated email acknowledgment must be sent to customer after enquiry submission

18. Scalability & Future Scope

Website should support:

- Future product additions
- New languages
- New regions
- Product Pricing Display (if applicable)
- Add to Cart / Cart Functionality (for enquiry or purchase flow)
- Integration with ERP / CRM

19.Analytics & Tracking

Vendor must implement complete tracking setup:

- Google Analytics 4 (GA4)
- Google Tag Manager (GTM)

Event tracking must include:

- Form submissions
- Button clicks (Enquiry / Download / Demo)
- Brochure downloads
- Product page visits

Additional tracking:

- UTM tracking for campaigns
- Conversion tracking setup

Optional (Preferred):

- Heatmap integration (Microsoft Clarity / Hotjar)

Vendor must:

- Configure tracking
- Test tracking
- Provide access & documentation

20. Content Upload & Management Scope

Requirement	Details
Content Ownership	All content (text, images, datasheets, brochures) will be provided by Aczet.
Vendor Responsibility	Vendor is fully responsible for uploading, managing, and formatting all content across the website.
Scope of Upload	Complete website content (~150 pages or as per sitemap) must be uploaded including products, images, and documents.
Content Formatting	Vendor must ensure proper structure (H1, H2, SEO tags), alignment, and correct placement of images, tables, and downloadable files.
Multi-language Handling	Vendor must upload all translated content and implement proper hreflang tags.
Quality Check	No dummy content, no missing data, no broken links, and consistent formatting across all pages must be ensured.
Content Limitation	No restriction on number of pages or content volume. Vendor is responsible for complete website population.
Completion Criteria	Project will be considered complete only when all content is fully uploaded, properly formatted, and website is ready for go-live without gaps.

21. UX / Conversion Requirement

- Clear CTA (Get Quote / Demo)
- Sticky enquiry button
- Product page must have enquiry + download
- Homepage must highlight industries + categories
  Website = Leads (not just design)

22. Commercial & Legal

Requirement	Details
Design Ownership	Vendor must not reuse templates or designs created for Aczet for any other client or competitor.
Code Ownership	Complete source code must be original and fully owned by Aczet. Vendor will have no ownership or reuse rights.
Cost Transparency	No hidden or additional costs will be accepted after project finalization. All costs must be defined upfront.
Scope Deviation	Any change or deviation from agreed scope must be documented and approved by Aczet before implementation.
