AGENT.md - Aczet Enterprise Platform Architecture & Agent Guide

Overview

This repository contains the complete enterprise website and CMS for **Aczet** (Manufacturer of Precision Balances, Micro-Balances, Moisture Analyzers, Industrial Weighing Systems, and Technical Instruments).

The application is built using:

- **Framework**: Laravel 11.x
- **Templating**: Laravel Blade Templates (Modern, Responsive, SEO & AI-Friendly UI)
- **Database**: MySQL (`aczet_db` on 127.0.0.1:3306)
- **Styling**: Modern CSS design system with corporate industrial aesthetic, SVG iconography, glassmorphic navigation, sticky enquiry CTAs, and interactive comparison tools.

Directory Architecture

```

Database Configuration & Setup

- Database Name: `aczet_db`
- Host: `127.0.0.1`
- Port: `3306`
- Username: `root`
- Password: `` (empty)

Commands for Setup & Reset

```
php artisan migrate:fresh --seed
php artisan serve --port=8000
```

Developer & Agent Guidelines

1. **Always use Blade Components & Extensions**: Extend `layouts.app` for website pages and `layouts.admin` for backend dashboard pages.
2. **Preserve SEO & AI Markup**: Ensure every public page maintains semantic H1/H2 tags, meta title/description tags, and JSON-LD schema blocks.
3. **Multi-Language Integrity**: Use the `$translations` helper dictionary or `__()` helper for UI labels. Ensure `dir="rtl"` is applied when `locale === 'ar'`.
4. **Lead Capturing**: All forms MUST submit to `/leads/store` or appropriate controller methods and capture region, product ID, and source tags.
