MonoTech Electromagnetic Force Compensation Principle

Document ID: ACZ-28D79A40 | ISO 9001:2015 & OIML R76 Certified

---

An engineering deep-dive into the design of single-block monolithic electro-magnetic force compensation (EMFC) weighing cells.

Highlights:
- Monolithic precision cut from aerospace-grade aluminum alloy.
- Drastic reduction in thermal drift and corner-load errors.
- 50% faster stabilization time under dynamic weighing conditions.
